

LATAPOXY® 310 Cordless Mixer

DS-708.0-1205

Novartis Pharmaceutical
Boston, MA
Architect: The Stubbins Associates
Contractor: Port Morris Tile & Marble, Boston, MA

- Triple productivity of vertical stone and tile installations and dramatically reduce labor costs
- Unmatched speed
- Cordless for convenience – great for scaffolding and tight areas
- Patented design and gear system
- Speed and dosing control allows for accurate application
- No mixing required, achieves an ideal mix

LATAPOXY® 310 Cordless Mixer is an exclusive dual component cordless mixer that quickly and easily dispenses LATAPOXY 310 Stone Adhesive onto ceramic tile, porcelain and stone veneers. Powered by a patented motor and gear design, optimal productivity and speed is achieved. Hundreds of square feet (square meters) can be installed per day with less effort and greater success with this system.

Compared to other cladding installation systems such as mechanical anchors, plaster and wire and thin-set, the LATAPOXY 310 system provides unmatched speed, versatility and productivity. Ideal for all interior cladding of tile, stone and porcelain veneers as well as approved exterior applications.

FEATURES	BENEFITS
Unmatched productivity and ease for vertical installations – porcelain, tile and stone	Easily install hundreds of square feet of tile or stone per day on interior or exterior applications using LATAPOXY® 310 Stone Adhesive.
Cordless power supply	Lightweight and convenient design allows for easy installation on higher elevations. No hoses or cords needed, always ready to use.
High output motor and gear system	Patented gear and motor design allows for dependable operation, even in cooler temperatures.
Automatic reverse	Reduces dripping from nozzle by automatically reversing drive rack to alleviate pressure.
Exclusive design	Manufactured specifically for use with LATAPOXY 310 Stone Adhesive.

Uses

- Used with LATAPOXY 310 Stone Adhesive
- Spot bonding marble, granite and large format ceramic tile on walls and overheads, interior or exterior applications.
- Adhesive for bonding masonry, precast concrete and stone panels.
- Ideal for fireplace surrounds, elevators and stair risers.
- Adhesive for bedding and fastening marble, granite and other stone slabs on walls and wainscoting.
- Adhesive for fabricating granite, marble and other stone.
- Great for lobbies, foyers, columns etc.

Suitable Substrates

(see Data Sheet 679.0 for additional information)

- Concrete
- Double wythe concrete masonry units
- Concrete masonry units (CMU)*
- Brick/stone*
- Exterior grade plywood*
- Cement backer board*
- Ceramic Tile*

* Interior use only.

For exterior applications please contact LATICRETE Technical Service 800.243.4788 or 203.393.0010 Ext. 235 or support@laticrete.com for approval prior to use.

Packaging

- LATAPOXY 310 Cordless Mixer (RT8480310) includes:
 - Cordless Mixer
 - One 14 Volt battery
 - Charger

- Cartridge Packs (for use with Cordless Mixer) regular and rapid version
 - 15 packs per carton
 - Standard version number S-310AB-CC-10
 - Rapid version Part Number S-310AB-CC-10-1
- Use only LATAPOXY 310 Mixing Nozzles – Part Number RT8480500 (10 Nozzles per carton)

Approximate Coverage

The coverage for LATAPOXY 310 Stone Adhesive will vary depending upon the amount of product required to plumb the wall. Based on 10% coverage of the specific veneer at 1/4" (6 mm) thickness, one carton (15 packs) will install between 150-300 ft² (13.5 m² - 27 m²).
