## **LATICRETE Donates to Help Benefit Museum of Natural History**

**July 1, 2008:** LATICRETE, a global leader in the manufacturing of innovative systems for the installation of ceramic tile and stone, generously donated LATICRETE® SpectraLOCK® PRO Grout to artist Julianne Calderon for her mosaic glass sculpture in the form of a dinosaur bench for a fund raising effort to benefit the University of Utah's Museum of Natural History. In the auction benefit themed "Dinosaurs to DNA," Calderon's bench piece titled "Dimetro Don" sold for \$6,500. All proceeds from the auction will go towards the University's goal of building a new facility.

"I have used LATICRETE SpectraLOCK PRO Grout for several years and highly recommend it," said Calderon. "It's easy to use and it's easy to clean up. Because it's an epoxy grout, it adds a lot of strength and integrity to my sculptures. And finally, I love that my sculptures don't fade in the sun and they require very little maintenance, other than an occasional wiping or quick cleaning."

LATICRETE SpectraLOCK PRO Grout is a LEED compliant, GREENGUARD certified epoxy grout offering the same high performance, color uniformity, durability and stain resistance of traditional epoxy grouts with extraordinary ease of use. In addition, LATICRETE SpectraLOCK PRO Grout inhibits the growth of stain-causing mold and mildew with antimicrobial protection provided by Microban®. LATICRETE SpectraLOCK PRO Grout meets ANSI A118.3 requirements, and is offered in 40 Lifestyle Colors and 220 additional colors when the Dazzle Option is selected.

United States Patent No.: 6881768 (and other Patents).
